EDUCATION BUSINESS & TECHNOLOGY

12/1993 **Certificate in Local Area Network Administration,**
New York University.
School of Continuing and Professional Studies.
145 4th Avenue, Room 201
New York, NY 10003-4906

12/1991 **Certificate in Mainframe Programming,**
The Chubb Institute-Jersey City.
40 Journal Square 1st Floor
Jersey City, NJ 7306-4009

05/1989 **B.S. Business Management with a Concentration in Finance,**
Binghamton University State University of New York.
P.O. BOX 6000
Binghamton, NY 13902-6000

EDUCATION HEALTH CARE

05/2002 **B.S. Professional Studies,**
Pacific College of Oriental Medicine.
915 Broadway, 2nd Floor
New York, NY, 10010-7108

05/2002 **M.S. Acupuncture,**
Pacific College of Oriental Medicine.
915 Broadway, 2nd Floor
New York, NY, 10010-7108

EXPERIENCE

Present **Adjunct Professor,**
1/2009 University of Bridgeport
126 Park Avenue
Bridgeport, CT 06604-7620

As an adjunct professor I am responsible for teaching future educators how to use instructional technology in the class room, the course covers social constructionist pedagogy using the learning objects model. Objects include texts, graphics, animations, slide shows, conferencing components, and videos for instructional web sites. Students will use digital image capture equipment, including digital cameras, camcorders, and scanners. The course material includes basic SQL, OOP, use of applets, image/movie formats, high-level Web authoring tools, PDF and OCR. Students learn to use open source, cross-platform software and wireless mobile computing in instruction.

Present **Founder**,
01/2005 CHS Life Limited Liability Company
P.O. Box 904
Branford CT 06405-5911

My involvement in healthcare led me to design an automated constructionist healthcare system. To my knowledge I am the only person in the world to successfully design and deploy a healthcare superhighway. A healthcare superhighway is a single system capable of processing an unlimited number of healthcare programs. A single CHS Life system can be used to deliver government healthcare programs, pharmaceutical orders, track charitable contributions, process wellness memberships, and private insurance claims; all from within a single application. In essence anyone and everyone can design and deploy a healthcare program or at least their part of a healthcare program. CHS Life was built using C#, .Net, and SQL Server 2005. The CHS Life system utilizes views, stored procedures, and batch processing techniques. CHS Life would not be possible without the use of object oriented design strategies and database referential integrity.

12/2009 **Acupuncturist**,
06/2002 Acupuncture Connecticut
1078 Main Street
Branford, CT 06405-5911

Responsible for all patient services delivered to a diverse suburban population. In addition to providing patient care, I was responsible for all office billing, CHS Life memberships, insurance policy processing, marketing, office construction, hiring and firing of sub contractors, business contract development, and ordering of office supplies.

01/1998 **Independent Consultant**,
06/1998 AT&T & United States Government
145 Station Rd Branchburg, NJ 08876-3537

Developed a client server system responsible for tracking all properties owned and leased by the United States Government, our team consisted of two AT&T business analysts, a senior developer, and me. I was responsible for the overall design, creating detailed system specifications, system testing, while coordinating projects with the senior developer and AT&T business analysts.

01/1998 **Senior Systems Analyst**,
01/1996 Dreyfus Corporation
200 Park Avenue
New York, NY 10166-000

Worked within a team of consultants and application developers responsible for enhancing and maintaining the Dreyfus client server system, these systems were responsible for managing \$170 billion in mutual fund assets. Independently built a software migration system, this system became responsible for coordinating the release of new software and coordinating the work of developers, database administrators, and quality control personnel.

01/1996 **Senior Systems Analyst**,
01/1995 Rainbow Advertising Sales
530 5th Ave # 6,
New York, NY 10036-511
www.rainbow-media.com

I was employed to re-engineer a national advertising contract entry system for the sales subsidiary of Cablevision Inc. This system was used by hundreds of data entry personnel and sales representatives nationwide. The goal of the redesign, which took approximately one year, was to increase both the speed and accuracy of the system with the end result being an increase in productivity and over all user satisfaction. In addition to my primary responsibilities, I re-designed a credit and collections system so it would accurately evaluate new and existing client accounts before authorizing and running of spot advertisement.

06/1994 **Systems Analyst,**
01/1991 New York University Medical Center
550 1st Ave,
New York, NY 10016-6402
med.nyu.edu

I was originally employed by NYU to build complex human resources reporting systems on their mainframe computer. After demonstrating proficiency on the mainframe I was recruited by another group to implement a PC to mainframe optical imaging system for patient records. I also participated in the development and maintenance of a day surgery scheduling system.

PROFESSIONAL AFFILIATIONS

Present Member

4/2009 Discovery in Aeronautics Systems Health (DASHLink)

DASHlink is a virtual laboratory for scientists and engineers interested in collaborating on problems in health management technologies for NASA aeronautics systems.

COMMUNITY INVOLVEMENT & SERVICE

Present **Volunteer**

1/2007 Allie's Dream, Inc.
26 Maple Vale Drive,
Woodbridge, CT 06525

I give my technical expertise and support to Allie's Dream, Inc. This support includes teaching the owners how to build their own web site and giving them a CHS Life account to help them meet their organization's objectives. Allie's dream is an independent, nonprofit organization that will provide full time, individualized programs for special education students with developmental disabilities. The program is designed to support students after they graduate from the public school system at age 21. The adult day program is designed to help these young adults with varying disabilities lead a successful life.

TECHNOLOGY COMPETENCIES

C#,
Visual Studio 2003-2005,
Microsoft SQL Server,
Oracle,
Sybase,
Gupta SQL Windows,
Computer conferencing (Blackboard, Moodle).
Video Conferencing (gotomeeting),
Whiteboarding (DimDim),
Application sharing (Skype).
Virtual Reality (SecondLife).
Web Authoring (rvSiteBuilder).
Image Editing and Layered Design (GIMP).
Scanning and Optical Character Recognition (OCR).
Digital Video (Movie Maker 2, iMovie).
File Transfer (FTP).
Spreadsheets (OpenOfficeCalc).
Slideware (OpenOffice Impress).
Desktop Publishing (Microsoft Publisher).
Outliners and Graphical Organizers (Word, Inspiration, C-Map).
Applets (Java & Flashlets).
Constructivist Pedagogy (MicroWorldsEX).
The Learning Objects Model.
SDK,
Novell Netware,
Clipper,
Cobol,
OS/JCL
